

TECHNICAL SKILLS

Languages

- Java
- Python
- QML

Testing & QA

- Selenium WebDriver
- TestNG
- Manual Testing
- SDLC / STLC
- Bug Reporting
- Agile Methodology
- Page Object Model

Tools & Platforms

- Git / GitHub
- Linux / Ubuntu
- VS Code
- VirtualBox
- EdgeDriver
- GitHub Copilot

APIs & Frameworks

- OpenWeather API
- PyOtherSide
- Clickable Framework

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Critical Thinking
- Team Collaboration
- Leadership

INTERESTS

- Automation Testing
- Cybersecurity Testing
- Open-Source Dev
- Linux Systems
- QA Engineering

ACHIEVEMENT

🏆 7th rank among 792 teams, Internal SIH 2025, Heritage & Culture / Open Innovation theme.

AMIT BHAGAWANT AWAD

QA / Test Engineer | Pune, Maharashtra

📞 +91 96999 54095 ✉ amit41thinkpad@gmail.com 🔗 linkedin.com/in/amit-awad 📄 github.com/awadamit41

PROFILE SUMMARY

QA/Test Engineer fresher with hands-on experience in manual testing, automation testing, and open-source application development. Skilled in Selenium WebDriver, TestNG, Java, Python, and Linux-based environments with knowledge of SDLC, STLC, Agile methodology, and bug reporting practices. Experienced in building automation frameworks, AI-assisted test scripting, and Ubuntu Touch application development. Strong interest in QA automation, cybersecurity-focused testing, and open-source technologies.

EDUCATION

B.Tech, Info Tech MIT-ADT University 2023 to 2027	CGPA: 7.41
Higher Secondary (HSC) 2023	79%
Secondary School (SSC) 2021	82%

EXPERIENCE

Software Development Intern, CIT-Services	July 2026 to September 2026
• Contributed to a live Time Management Application using QML, Python, and Qt. • Developed UI components and application features; debugged and resolved software issues. • Collaborated with the development team using Git/GitHub for version control. Tech Stack: QML, Python, Qt, Git, GitHub, JavaScript/TypeScript	

PROJECTS

AI-Based Test Script Generation for Banking Login <i>Java · Selenium · TestNG · GitHub Copilot</i>
• Developed AI-assisted automation testing project for banking login validation using GitHub Copilot for faster test script generation. • Automated positive and negative login test cases on Microsoft Edge via EdgeDriver; implemented Page Object Model (POM) for scalable, maintainable automation. • Improved test coverage, debugging efficiency, and overall automation maintainability.

WeatherViewer, Ubuntu Touch Weather Analytics Dashboard <i>QML · Python · Ubuntu Touch</i> GitHub: github.com/awadamit41/WeatherViewer
• Built a modern weather analytics dashboard for Ubuntu Touch/Lomiri integrating OpenWeather API for real-time temperature, humidity, and condition data. • Implemented city-based search with animated, responsive UI using reusable QML WeatherCard components; connected QML front-end to Python back-end via PyOtherSide. • Managed GitHub version control, Ubuntu Touch packaging, and release workflow in Linux environments.
